## Intisari

**Pendahuluan:** Sangat penting untuk segera memulai pertolongan pertama agar korban terhindar dari kematian atau cedera yang lebih serius. Karenanya pengetahuan tentang teknik pendukung kehidupan dasar dan cara merawat korban tenggelam sangat diperlukan dalam menghadapi situasi seperti itu, agar pertolongan yang diberikan lebih tepat. Akibat kurangnya pemahaman masyarakat tentang situasi darurat, banyak insiden pertolongan pertama atau kesalahan dalam perawatan awal. **Tujuan:** penelitian ini adalah untuk mengetahui Pengetahuan Masyarakat Tentang Pertolongan Pertama Korban Tenggelam di Desa Utama Kecamatan Cijeungjing. **Metode:** penelitian ini adalah metode deskriptif kuantitatif dengan rancangan penelitian cross sectional. Sampel pada penelitian ini sebanyak 115 responden Masyarakat di Wilayah Desa Utama Kecamatan Cijeungjing. Penelitian dilakukan pada tanggal 29-31 April 2023. **Hasil:** Responden yang memiliki tingkat pengetahuan kurang sebanyak 62 orang (53,9%), 52 orang (45,2%) yang memiliki tingkat pengetahuan cukup, 1 orang (0,9%) yang memiliki tingkat pengetahuan baik. **Kesimpulan:** Bahwa pengetahuan masyarakat yang ada di wilayah Desa Utama Kecamatan Cijeungjing masih banyak yang kurang memiliki pengetahuan terhadap pertolongan pertama pada penanganan korban tenggelam.

Kata Kunci: Korban Tenggelam, Masyarakat, Pengetahuan, Pertolongan Pertama

## **COMMUNITY KNOWLEDGE ABOUT FIRST AID TO DROWNING VICTIMS IN UTAMA VILLAGE CIJEUNGJING DISTRICT**

### *Abstract*

**Introduction:** It is very important to start first aid immediately so that the victim can avoid death or more serious injury. Therefore knowledge of basic life support techniques and how to care for drowning victims is very much needed in dealing with such situations, so that the assistance given is more appropriate. As a result of people's lack of understanding of emergency situations, there are many incidents of first aid or errors in initial treatment. **Purpose:** this study was to determine Community Knowledge About First Aid for Drowning Victims in Main Village, Cijeungjing District. **Method:** this research is a quantitative descriptive method with a cross sectional research design. The sample in this study were 115 community respondents in the Main Village area of Cijeungjing District. The research was conducted on April 29-31, 2023. **Results:** Respondents who had a low level of knowledge were 62 people (53.9%), 52 people (45.2%) had a sufficient level of knowledge, 1 person (0.9% ) who have a good level of knowledge. **Conclusion:** That the knowledge of the people in the Main Village area of Cijeungjing District still lacks knowledge of first aid in handling drowning victims.
