**Manuscript ID: IJCBNM-2109-1883**

**Manuscript Title: Coaching Clinic as a Strategy to Improve Knowledge and Competence of Nurses in Providing Genetic Counseling Interventions among Thalassemia Patients**

**Authors: Henri Setiawan**

**Dear Mr. Henri Setiawan**

**We are pleased to inform you that your article entitled Coaching Clinic as a Strategy to Improve Knowledge and Competence of Nurses in Providing Genetic Counseling Interventions among Thalassemia Patients is submitted successfully to the International Journal of Community based Nursing & Midwifery.**

**Please be sure that the submitted manuscript has not been published previously and will not be submitted elsewhere prior to our decision.**

**As you well know the International Journal of Community based Nursing & Midwifery is an open access, peer-reviewed journal and the payment of fee is mandatory for all types of manuscripts sent to the IJCBNM. These fees cover the expenses incurred by publication, including journal production, web hosting, CMS, database, online repository, archiving, editing, and open access publication.**

**For Iranian Author:** We will appreciate if you can pay the submission fee as stated in the article charge table on the website within three working days. So, we can proceed with the process of reviewing your article; otherwise, your article would be archived. Please make the payment to this Bank account number: 8847106400 or Shaba number: IR89012000000008847106400 according to the [link](#) and send us the receipt by [ijcbtnm1@sums.ac.ir](mailto:ijcbtnm1@sums.ac.ir). Make sure that you have put your name and manuscript ID in the receipt.

**For Non-Iranian Author:** We will appreciate if you can pay the submission fee as stated in the article charge table on the website within seven working days. So, we can proceed with the process of reviewing your article; otherwise, your article would be archived.

**It should be noted that this journal in order to provide its services uses the facilities of a well-known international company called SCI & TECH UNIVERSAL Inc. The company will contact you soon by email to let you know how to pay the submission fee. It would be appreciated to let them know when you made the payment.**

**If you have any question regarding the submission fee of your manuscript payment, please do not hesitate to contact them at the following address: [support@scitech.info](mailto:support@scitech.info)**

**Time to receive acceptance is dependent to authors' cooperation in responding to reviewers' comments but it could be estimated nearly 3-4 months. We welcome your submissions to International Journal of Community based Nursing and Midwifery.**

**We are looking forward to hearing from you.**

**Best regards**

**Editor in chief of International Journal of Community Based Nursing & Midwifery**

1 **Coaching Clinic as a Strategy to Improve Knowledge and Competence of Nurses in**  
2 **Providing Genetic Counseling Interventions among Thalassemia Patients**

3

4 Dear Editor,

5 Knowledge and competence of nurses in providing genetic counseling interventions in Indonesia needs to  
6 be improved.<sup>1</sup> The reason is, both thalassemia patients and their parents as the closest caregivers, need  
7 comprehensive information about the genetic problems they are experiencing, the impacts that arise, and  
8 the therapeutic management that needs to be done. It is intended that thalassemia patients and caregivers  
9 have good enough knowledge, so that they are able to adapt to physical and psychological problems that  
10 arise such as worry, anxiety and depression.<sup>2</sup> Unfortunately, the knowledge and competence of genetic  
11 counseling intervention is not strong enough for nurses due to several factors such as the lack of integration  
12 of genomic nursing in the nursing education curriculum, the absence of a genomic nursing collegium or  
13 association under the Indonesian National Nurses Association (PPNI), and most importantly the absence of  
14 regulations set forth in the form of standard operating procedures in hospitals and clinics.

15 One of the efforts that can be done to strengthen the knowledge and competence of genetic counseling  
16 is coaching clinic. The learning model with coaching clinic allows nurses to receive information about basic  
17 knowledge of genetic counseling, as well as gain adequate experience from clinical practice. Coaching  
18 Clinic can use various learning methods such as Discovery Learning (DL), Small Group Discussion (SGD),  
19 Role Play and Simulation (RPS), Collaborative Learning (CL) and, Project-Based Learning and Inquiry  
20 (PBL).<sup>3</sup>

21 The DL model is used as a strategy to obtain conclusions about the basic concepts of genetic counseling  
22 and the role of nurses as counselors through an intuitive process. However, the depth of the intuitive process  
23 is limited to the knowledge, literacy, and experience of each nurse. This model needs to be strengthened  
24 with the SGD (active based learning) method so that interactions occur between nurses and produce  
25 conclusions that are more critical, systematic, and widespread.<sup>4</sup> These two methods are very appropriate to

26 be used to discuss related topics such as human genome project, chromosomal aberration, gene mutation  
27 on thalassemia, therapy management and implication of nursing metaparadigm.

28 The RPS, CL, and PBL models will be more effectively used to strengthen the experience of nurses in  
29 designing a case, overcoming the main problem in the case, preparing a work plan, providing genetic  
30 counseling interventions and evaluation. The scenarios made describe the variety of physical and  
31 psychological problems in thalassemia patients and their parents as caregivers who are closest to the patient.  
32 Pre-briefing and post-briefing are carried out to ensure nurses understand the context of the problems  
33 experienced by thalassemia patients and caregivers. Thus, nurses can develop a detailed and specific genetic  
34 counseling intervention plan.<sup>5</sup>

35 The level of knowledge and competence of nurses was measured before and after the Coaching Clinic  
36 to capture changes in the outcome target score using the appropriate instrument. Although it is certain that  
37 the favorable score will increase, the degree of success of the coaching clinic strategy may not be the same  
38 at different times and places. Therefore, outcome measurement is required in this coaching clinic. No matter  
39 how strong the level of significance of the influence of the coaching clinic is, the experience of nurses from  
40 this coaching clinic has a positive influence on the attitudes and character of nurses to optimize their roles  
41 and functions as counselors in providing genetic counseling.<sup>6</sup>
